

UNICO, Inc.

TX Valves

Below is a table that shows what part numbers you need to order in the event you need to replace a Unico coil TX valve. Based on the coil model number, when the unit was manufactured, and depending if the coil is straight cooling or heat pump, you can easily determine what valve you will need. Keep in mind that you can use a heat pump valve in place of an AC.

There are three styles of valves – sweat connections, threaded connections (Chatleff), and flare connections.

All modular coils manufactured prior to 2002 use sweat valves and these are clearly identified in our parts list:

Model	Valve Model (both AC and HP)	Refrigerant
2436	A00031-003 (IVE-2.5-GA)	R-22, R-407C
4260	A00031-004 (IVE-4.0-GA)	R-22, R-407C

Note: HP models use a standard 3/8" line external check valve.

All modular coils manufactured after 2004 use mechanically threaded (Chatleff) connections.

Model	AC	HP	Refrigerant
2430	A00805-002 (IVE-2.0)	A00808-002 (CBBIVE-2.0)	R-22, R-407C
	A00805-013 (BBIZE-2.0)	A00808-013 (CBBIZE-2.0)	R-410A
3462	A00805-004(IVE-3.0)	A00808-004 (CBBIVE-3.0)	R-22, R-407C
	A00805-014 (BBIZE-3.0)	A00808-014 (CBBIZE-3.0)	R-410A
4860	A00805-005 (IVE-4.0)	A00808-005 (CBBIVE-4.0)	R-22, R-407C
	A00805-015 (BBIZE-4.0)	A00808-015 (CBBIZE-4.0)	R-410A

Note: HP valves include an internal check valve.

Modular coils manufactured in 2002-2003 may be of either type. Please verify the style when ordering a replacement.

All 1218 coils use flare connections

Model	AC	HP	Refrigerant
1218	A00365-001 (BIVE-1.5)	A00366-001 (CBIVE-1.5)	R-22, R-407C
	A00365-002 (BBIZE-1.5)	A00366-002 (CBIZE-1.5)	R-410A

Note: HP valves include an internal check valve.
